EDUCATION

Shri Ramdeobaba College of Engineering, Nagpur
B.Tech Computer Engineering (Cyber Security) | **SGPA: 8.5**

Aug 2023 – Present

PROFESSIONAL SUMMARY

Cybersecurity undergraduate with hands-on experience in digital forensics, network traffic analysis, and threat analysis through projects and CTF competitions. Skilled in incident response and blue-team tools; seeking a SOC Analyst or Cybersecurity Intern role to apply technical skills in a professional environment.

TECHNICAL SKILLS

- **Cybersecurity & Networking:** Network Traffic Analysis, Log Analysis, Incident Response, Digital Forensics, OSINT, Email Security.
- **Security Tools:** Nmap, Wireshark, Autopsy, Burp Suite, Hashcat, John the Ripper, Kali Linux.
- **Programming & Scripting:** Python (automation and scripting), Bash, C, Java.

EXPERIENCE

CFT (Crypto Forensic and Technology)

Under the guidance of Shri Shrikant Ardhapurkar

Internship

Nagpur, India

- Performed digital forensics and data recovery on compromised or damaged storage media.
- Applied forensic tools and investigative methodologies to identify and recover critical data.
- Conducted hands-on investigations into storage device evidence and recovery processes.

PROJECTS

Phishing Link Analyzer

[View on GitHub](#)

- Developed a PyTorch-based deep learning engine (1D-CNN) integrated with an interactive Streamlit dashboard to detect and explain phishing URLs.
- Implemented live network monitoring via Wireshark to intercept traffic, evaluate domain risks in real-time, and trigger automated security alerts.

S3 Bucket Security Scanner

[View on GitHub](#)

- Developed a Python-based security scanner to detect publicly accessible and misconfigured Amazon S3 buckets.
- Implemented checks for anonymous access and permission misconfigurations to assess cloud data exposure risks.

Cybersecurity Workshops & Challenge Design

- Designed and organized beginner-friendly security challenges, walkthroughs, and workshops for peers.
- Conducted training sessions covering digital forensics, cryptography, OSINT, and reverse engineering.
- Coordinated **ByteBreak CTF** to promote hands-on cybersecurity learning and competitive spirit.

CTF COMPETITIONS & SECURITY LABS

- **REDFOX CTF:** Achieved an All India Rank of 37.
- **CyberStorm 2025:** Participated in Mumbai's largest CTF event, solving challenges under high-pressure scenarios.
- **Problem Solving:** Successfully solved numerous challenges involving password cracking, network traffic analysis, file forensics, and basic exploitation.

CERTIFICATIONS & LANGUAGES

- **Certifications:** Zscaler Zero Trust Associate (ZTCA), Google Cloud Computing Foundations, Certified Cyber Forensic Examiner (CCFE).
- **Languages:** English (Professional), Hindi (Native).
